

California TAM Master Public Source Directory

Complete revised version - preserves the original link directory and adds ABC classification, warehouse/logistics sources, NAICS filters, and ZoomInfo buyer-title searches.

This version is intentionally built as the master reference: every link category from the first PDF is carried forward, then expanded. Use it as the source map for Excel tabs, ZoomInfo searches, Power BI territory views, and branch-level prospecting.

Item	Direction
Primary Goal	Turn public datasets into named sites by vertical, ZIP, county, branch, and rep.
Best First Build	Apartments, medical, RCFE, schools, SNAP/grocery, ABC, hospitality, warehouses/logistics.
Key Correction	Newer sections should add to the original link list, not replace it. This version does that.
Last Checked	May 15, 2026. Recheck links before production ingestion.

ABC Liquor-License Classification Logic

ABC licenses become useful for TAM only after classification. The clean method is: license type first, business/premises name second, and cross-check third. For example, Type 20/21 with "market" or "liquor" should not be treated the same as Type 47 with "restaurant" or Type 48 with "bar".

Target Classification	Useful ABC License-Type Clues	Rule / Keyword Logic	Workbook Category
Restaurant	Type 47, 41, 75, 77	On-sale eating place indicators. Prioritize if name contains restaurant, grill, cafe, kitchen, taqueria, sushi, pizza, diner, bistro, BBQ, ramen, deli. Cross-check Google/website only if needed.	Restaurant / Food Service
Bar / Nightclub	Type 48, 42, 61	On-sale public premises or beer/wine public premises. Name clues: bar, lounge, tavern, nightclub, saloon, pub, cantina, cocktail, sports bar.	Bar / Nightclub
Private Club	Type 50, 51, 52, 57	Club licenses. Name clues: lodge, veterans, country club, social club, fraternal, yacht club, golf club, Elks, Moose.	Private Club / Association
Market / Grocery / Convenience	Type 20, 21, 86	Off-sale beer/wine or general. Name clues: market, foods, liquor, mini mart, convenience, grocery, gas, deli. Cross-check SNAP retailer data.	Market / Grocery / C-Store
Liquor Store	Type 21	Off-sale general. Name clues: liquor, spirits, bottle shop, wine & spirits. If restaurant/hotel clues dominate, review manually.	Liquor Store
Hotel / Lodging	Type 67, 70, 47 with hotel name	Hotel/motel premises, hotel-name match, or restaurant license at known hotel property. Cross-check FEMA/hotel datasets and lodging lists.	Hotel / Lodging
Brewery / Winery / Distillery	Type 01, 02, 23, 74, 75	Manufacturer/tasting-room indicators. Name clues: brewery, brewing, taproom, winery, vineyard, distillery, cellar.	Manufacturer / Tasting Room
Warehouse / Distributor	Type 09, 10, 11, 12, 13, 14, 17, 18	Importer/wholesaler/distributor license indicators. Name clues: distributing, warehouse, logistics, beverage, wholesale, import.	Distributor / Warehouse
Event Venue / Banquet Hall	Type 47, 48, 58, 77	Name clues: banquet, hall, events, ballroom, venue, catering, center. Review manually because many venues hide inside restaurant/hotel licenses.	Venue / Event Space
Unclear / Review	Any mixed signal	If license type, premises name, and business name conflict, mark review needed. Example: LLC name says hotel but premises is a restaurant inside hotel.	Manual Review

Recommended ABC workbook columns: ABC License Number, License Type, Status, Premises Name, Owner Name, Address, ZIP, County, Initial Category, Keyword Match, Cross-Check Source, Final Category, Classification Confidence, Manual Review Flag, Notes.

Warehouse / Logistics Vertical Build Notes

Warehouses are different from schools, RCFE, and healthcare because the best public sources usually give counts by geography, not a clean statewide named-site list. Use public data to prioritize ZIPs and counties, then use ZoomInfo, D&B;, current accounts, rep intelligence, and field verification to turn the count layer into named prospects.

Layer	Recommended Source	Purpose
Count Layer	Census County Business Patterns / ZIP Code Business Patterns	Estimate the number of establishments in target NAICS codes by county or ZIP.
Industry Definition	BLS NAICS 493 / Census NAICS	Validate whether a company belongs in warehousing/storage or another logistics category.
Named-Site Layer	ZoomInfo / D&B / existing customer and canceled customer files	Convert the count layer into real businesses with contacts.
Risk Ranking	Food/cold storage keywords + refrigerated NAICS + ABC distributor signals	Prioritize warehouses with food, beverage, cold-chain, audit, or regulated inventory exposure.

Warehouse priority keywords for ZoomInfo: warehouse, distribution center, logistics, fulfillment, cold storage, refrigerated, food distributor, beverage distributor, 3PL, cross-dock, supply chain, wholesale, produce, dairy, meat, seafood.

NAICS Reference Section for Pest-Control Prospecting

Use NAICS as a targeting filter in ZoomInfo, D&B;, Census CBP/ZBP, and commercial enrichment tools. NAICS should not replace public source files; it should help find additional businesses and contacts once the vertical universe is defined.
